

Sunbeam House Services responds to the publication by HIQA of their last inspection report dated September 28, 2017.

SHS acknowledges the content of this report published today. We accept its contents and wish to assure those we support, their families and other stakeholders of our continuing efforts to remedy the issues raised.

Since this last inspection we have embarked on a series of actions designed to make significant improvements in this location.

We have taken steps to ensure the safety of all 12 residents currently residing in this location. We have increased the level of staffing both front line and managerial. The decongregation plan in respect of the first phase is being implemented. The HSE are completing the purchase of two properties to facilitate the moving of individuals to more appropriate settings in the community. Staff are working with residents in preparation for this transfer.

We hope that the actions currently completed and underway will allow HIQA to remove their proposal to cancel the registration of this centre.

Issued on behalf of Sunbeam House Services, Hugh Kane, CEO.
